

Virus Diagrams

Color and label the viruses below. Include the names of the virus as well. Answer the questions in complete sentences.

1. Discuss why viruses are not classified as living things. Include in your answer a discussion of how living things are named, compared to viruses. Provide examples to strengthen your case.
2. Explain why viruses are parasites, using the words *ribosomes*, *host cell*, and *enzymes* in your answer.
3. Discuss what viruses are made of.
4. Discuss *vaccine*. What is it? How is it used? Provide examples.
5. Discuss how viruses reproduce. Discuss the host cell and what structures are used for viral duplication.
